## Signing Ceremony of China-themed Editorial Department in Canada

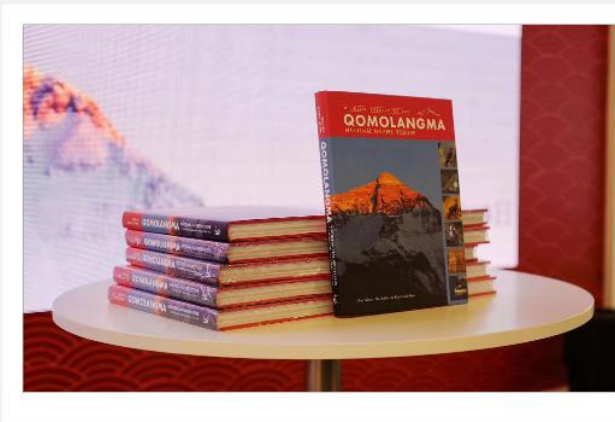

We were happy to establish the China-themed Editorial Department in Canada with our partner.

## Launch Ceremony of *An Ideological History of the Communist Party of China ( 3 volumes)* and *Wildlife Species of the Qomolangma National Nature Reserve*

We launched 2 new books. *An Ideological History of the Communist Party of China ( 3 volumes)* traces the development of the thought underlying the CPC's policies, methods, and actions since its establishment in 1921. It presents an inside look at the shaping of the Party's ideology, reflecting the ways in which that ideology has played out in the CPC's social, political, military, economic, and cultural agendas.

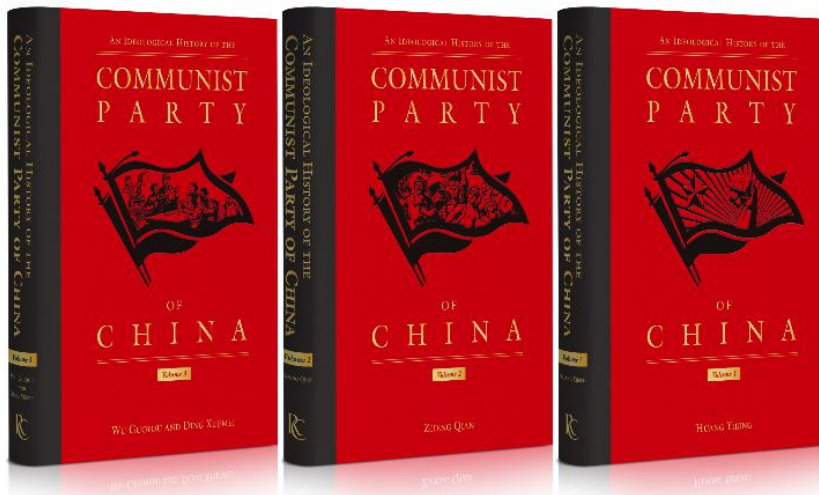

*Wildlife Species of the Qomolangma National Nature Reserve* is an academic monograph on the conservation and sustainable protection of wildlife. It systematically describes the natural environment of the entire Qomolangma Reserve, as well as the overall situation and historical investigation of species of terrestrial wildlife.

I was very pleased to accept the interview by CCTV to introduce our important new book--*An Ideological History of the Communist Party of China (3 volumes)* to world readers.

It is a must read title about CPC. The first volume covers the period from the founding of the Party through a turbulent period of armed revolutionary struggle until the establishment of the new China in 1949. The second volume picks up there and continues through 1978, the year the Reform and Opening Up policy was launched. The final volume in the series traces the various policies and development of the CPC's ideology through the Reform and Opening Up era until the present.

We also met with our old and new friends, and signed new titles with our partners.

*Thank you !*
